ABOUT ME

Third-year AI and ML-focused Computer Science student at Symbiosis Institute of Technology, Nagpur, who enjoys building intelligent software end to end, from training models on real data to developing cloud-connected apps. I have completed an AI/ML internship and compared machine learning models for air quality prediction.

Currently, I am developing EmpFlow, an HR management system, with my PBL team, building a portfolio website, and practising data structures and algorithms in Python. I also recently completed a course on agentic AI.

My goal is to grow into an AI/ML engineer who builds practical systems that make everyday software smarter. Over the next few years, I plan to deepen my machine learning skills, add more AI projects to my GitHub, and gain industry experience through internships, leading to a role on a product or AI-focused team.

EDUCATION

Class 10th (CBSE) - Passed

Class 12th (HSC) - Passed

B.Tech, Computer Science and Engineering (AI & ML)

Symbiosis Institute of Technology, Nagpur (Symbiosis International University)

Batch: 2024 - 2028

EXPERIENCE

AI/ML Intern Maincrafts Technology

- Completed a four-week internship in Artificial Intelligence and Machine Learning and received a certificate for contributing to projects.

PROJECTS

EmpFlow: Cloud-Based HR Information System Flutter, Dart, Firebase

- Team project (3 members) to keep employee records in one place and make day-to-day HR work easier.
- Built login with role-based access, live employee search, QR codes for employee ID, and PDF and Excel report export.
- Used Firestore for data, Firebase Storage for files and Cloud Messaging for notifications. Wrote the project paper in IEEE format.

AQI Prediction Using Machine Learning Python

- Compared Random Forest, XGBoost and KNN to see which predicts air quality best from pollution data.
- Explored using IoT sensors to bring in real-time, local AQI readings.

SKILLS

Programming Languages: Python, Java, C, C++, Dart, SQL

Tools & Frameworks: Flutter, Firebase (Authentication, Firestore, Storage, Cloud Messaging), Git, GitHub

Soft Skills: Communication, Teamwork, Leadership, Problem Solving, Time Management, Adaptability

COURSES

Mastering Agentic AI: From Prompt to Protocols to Production Udemy

Taught by Vinit Singh, 38 total hours

Data Structures and Algorithms using Python, Part 1 Infosys Springboard

Python Programming with Red Hat (AD141), Ver. 9.0 Red Hat

Certificate of attendance, 32 credit hours

Red Hat System Administration I (RH124), Ver. 10 Red Hat

Certificate of attendance, 40 credit hours

ACTIVITIES

- Volunteer, SITank 2.0 (Enthusia 5.0), SIT Nagpur. Certificate of Appreciation received.
- Volunteer, Advantage Vidarbha.
- Fitness for Freedom Run: ran the 3 km student category for the SIT Nagpur team.
